1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 12, and 15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Barr (cited by Applicant). Barr discloses the claimed subject matter including a rescue apparatus with a base 50, a housing (including 52, 54), a triggering mechanism 58, an alarm (note column 5, lines 24-26, for example), and a floatation device 12.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barr in view of Glass, Jr. Barr does not disclose a visual alarm, a rotating light or a radio transmitter. Glass, Jr. teaches a visual alarm 20 which can rotate about line 18 and a radio transmitter 16. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Barr with a rotating visual alarm and a radio transmitter for improved safety.

5. Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barr. Barr does not disclose mounting the device to a pole or a buoy. It would have

been an obvious choice of engineering design to a person of ordinary skill in the art at the time the invention was made would have been to mount the device of Barr anywhere a life preserver would be generally needed including at a beach pier pole or on a buoy in order to provide increased swimmer safety and to save lives.

6. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barr in view of Mullisen et al. Barr does not disclose a tube or a can. Mullisen et al teach a tube or can 24. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Barr with a tube or a can as taught by Mullisen et al for improved protection and durability.

7. Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
